

Submitter: Carol Pinegar

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB3932

Chair Lively, Vice-chairs Gamba and Levy and Committee Members,

I'm writing to ask you to support HB 3932 so beavers can help restore Oregon's thousands of miles of impaired waterways.

Beavers are ecosystem engineers. In natural systems, they dig canals and build dams, helping to slow water flow, restore impacted water tables and underground aquifers, establish natural wetlands that filter toxins, and create wildlife and fish habitat all at once.

According to the Department of Environmental Quality (DEQ), over 100,000 miles of Oregon waterways suffer from poor water quality; that's more than 2/3rd of surveyed waterways in Oregon (106,390 miles) classified as "impaired." DEQ is tasked with restoring these waterways but lacks the resources to do so at the scale needed. This is where beavers can help — for free!

Passing HB 3932 will allow beavers to help restore these waterways by closing hunting and trapping of beavers on these impaired waterways on public lands.

Robust scientific evidence shows that beaver dam complexes can address most of the poor water quality issues. This bill is not about limiting beaver harvest or increasing beaver population, but it will enable beavers to access waterways where they need to be and remain long enough to perform their ecosystem functions.

Please support HB 3932 — a natural and free solution to our state's water quality crisis. ?

Sincerely,

Carol Pinegar
