

# Growth Rate

Portland, Oregon

| 2019 - 2025

**Simple  
Growth Rate:  
425.00%**

**Compound  
Annual  
Growth Rate:  
31.83%**

\* The Growth Rate displayed in the visualization represents the change in the count of suspected IMBs within the selected date range. It displays the average of the current month for each year in the range (If it is August, it will show the August average for each year from 2019-2024). This calculation is based on publicly available data.

\* Simple Growth Rate (SGR) is the overall percentage change in the number of suspected IMBs. It's calculated as the difference between the ending and starting values, divided by the starting value.

\* Cumulative Annual Growth Rate (CAGR) is the average yearly growth rate over a period of time, taking into account the effect of compounding. It's calculated by determining the ratio between the final and initial values. This ratio is then raised to the reciprocal of the number of years. Next, one is subtracted from the resulting value.

\*Additional data source included starting 2023-07
