

House Committee on Education

March 27, 2025

To Whom it May Concern,

I am a parent of a student who goes to a virtual charter school and it has made an incredible difference in my children's learning journey. I have come to understand that virtual charter schools do not get access to the same amount of money as regular public schools. I think every child should get the same amount of money for their education, no matter what kind of public school they go to. The Student Success Act was made to help students who need it the most, but virtual charter students are not included. HB 2583 is about making sure all students have the same chance to get money from the SIA, no matter where they learn, just like students in regular public schools. Let's make education is fair for all students in Oregon.

Sincerely yours,

Mia Snowley
