

Submitter:

Stephen Freilinger

On Behalf Of:

Committee:

Senate Committee On Judiciary

Measure, Appointment or Topic:

SB243

I oppose this legislation! The acts of violence imposed on everyday citizens is horrific but SB 243 will not solve the problem! Firearms are not what cause the problem when a deranged individual gets it in their head that they want to commit violence. It is the lack of integrity, empathy, morality and a sense of responsibility to your fellow human beings that create this mindset! Someone who does not have these values will not stop because the State Of Oregon decides they can impose more regulation on the law abiding and responsible firearm citizens. It is totally counter intuitive to think that more regulations will improve the violence problem when the firearm laws on the books right now do nothing to stop the violence. The only thing more regulation does is punish lawful and responsible gun ownership by folks who do all they can to be responsible firearm owners. Deranged individuals without empathy, integrity or morality will break every rule the legislature imposes on decent folks to facilitate their act of insanity. Stop it! You are just wasting your time, money, and effort and all for nothing gained! Please reject this legislation and find a solution for these acts of violence does not infringe on our 2nd amendment rights! Oppose SB243!!
