

Submitter:	Eric Brenneman
On Behalf Of:	Donor conceived people
Committee:	Senate Committee On Judiciary
Measure, Appointment or Topic:	SB163

As a late discovery BIPOC DCP, any baseline legislation for this unregulated and corrupt industry based in colonialism, white supremacy, racism, and eugenics is overdue.

The fertility industry was never made for us; it was made to protect donors and give parents a child. Once born, they grab their millions in profit and are done with us as humans.

As DCP, we have no or limited info on 1/2 of our genetic background for years to decades on end. We also have no clue who we're related to increasing risk of accidental incest.

As a therapist, the weight of discovery or being a known DCP with all of the above info blank can be devastating on mental health.

Happy to support the bill and hope to see more spread to other states.
