Measure, Appointment or Topic:

SB243

Unlike the title and scope of this bill, it literally does nothing to promote any additional 'safety' enforcement decades of laws for sentencing criminals, nor does take even a step towards prosecuting any criminal.

It will however make misdemeanor criminals of thousands of long standing law abiding citizens.

As in this and the last several firearms restriction and or this restrictive unless paid, approved and pay again annually .. to observe an already constituents right.

When could we see real measures towards public safety without politics or just enforcing and prosecuting criminals consistently, providing some small measure of public safety?

Added fees, standard magazine restrictions or this pay to observe basic protected rights....

Just another way to inflate a general fund, not providing a service of safety, and do discernible justification to any law abiding citizen whom has not infringed the law to even temporarily loose their rights. This is a typical and standard overreach which should be opposed.
