

Submitter:

Darla Meeuwsen

On Behalf Of:

Committee:

Senate Committee On Education

Measure, Appointment or Topic:

SB735

I am in support of SB 735

Exempt public charter schools from the abbreviated school day program requirements if:

Most of the students enrolled in the school are not students with disabilities.

The school is not specifically designed to serve students with challenging behaviors or complex medical needs.

The school's regular schedule provides at least 95% of the instructional hours that students in the same grade get in their local district.

The student is not required to attend fewer hours than most other students without disabilities in the same grade at the same charter school.

All of these changes would make a tremendous difference!

Thank you
