

Submitter: Kim Rice

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure, Appointment or Topic: SB1187

No. We do not need to establish any such program. What we need to do is let our forests be managed properly. Let our farmers and growers produce their yields and that in and of itself will steward the land much better than is currently happening. Oregonians are tired of being mismanaged and overregulated in the name of climate change. Just stop.

Vote NO on SB 1187.
