

Submitter: Michele Powers

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure, Appointment or Topic: SB1187

As a private land owner who works diligently on restoring the property to a native ecosystem, this super fund bill is only being used to gather money from Oregonians, and under misguided and false pretense that humans can impact climate in any way. Does climate change? Yes, as it has long before human civilization and long after until the planet runs out of time. The only things humans can impact are on clean water and air and focus efforts there. This commission will only take resources away from the people, the ones who ultimately must be the change
