

Submitter: Lucy Kennedy-Wong

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure, Appointment or Topic: SB1187

Dear Senate Committee On Energy and Environment,

My name is Lucy Kennedy-Wong and I am writing in support of SB 1187. I see the effects of climate change all around me -- in higher summer temperatures, more disastrous wild fires, worsening air quality, the list goes on. And yet, where are the funds to help mitigate these impacts? Neighborhoods and community members hit hardest by these effects have not been financially benefiting like fossil fuel companies have. It feels like every tier of government right now is facing a budget crisis. I was so happy to see a bill like this that would work to right this wrong and put funds towards what is one of the greatest crises of our time, climate change.

Thank you for thinking of the future of Oregonians, and please support this bill,

Lucy
