Senate Committee On Judiciary

Measure, Appointment or Topic:

SB243

SB 243 is blatantly unconstitutional! Just because Oregon's bill of rights doesn't include the verbiage "shall not be infringed" doesn't mean that the 2nd ammendment doesn't exist. None of the added pages in the addendum actually works towards solving gun violence but is rather blatantly trying to make criminals out of good people who have done nothing wrong just by exercising their right to bear arms. Not to mention that excluding youth from access to guns means gun safety can't be appropriately taught when it's most important. These last minute underhanded tactics to get bills passed with extra restrictions needs to stop. Don't forget that the government works for the people & the people have every right to full transparency.
