

Submitter: Andrew Lewis

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure, Appointment or Topic: SB1187

I'll keep this short and sweet. I'm an eastern Oregon land owner and I do all I can to take care of my ground. I am a climate change skeptic, due to this fact, I am hugely opposed to SB1187. This State taxes us far too much right now. At some point I will reach a financial breaking point and will have to leave like so many other's have done over the past couple of years. Why do they (we) leave? It's due to all of these pet projects that take our tax dollars and spend on hair brained ideas with no specific quantifiable goals and outcomes.

Get back to doing what Government is supposed to do, take care of the citizens without being intrusive into their lives. Fix the problems that are currently known and not go out and look for other reasons to tax the populous.

Vote no on SB1187.
