

Submitter: Anthony Scribner

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure, Appointment or Topic: SB301

Please do not allow larger wake boats around nonpowered, smaller watercraft. The wake causes unsafe river conditions for other smaller boats. As a kayaker and dragon boat racer, I have seen countless times where wakeboard boats are unaware of how they're wake affects other watercraft. Flipping boats and continuing to travel on without even rendering assistance. I do not want to see more capsized boats and people endangered by their craft and lack of responsible piloting.
