

Submitter: Leslie Harris

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure, Appointment or Topic: SB301

The latest study from MacGregor shows that these surf boats need nearly 500ft to mitigate (not dissipate) their wakes. The Willamette is on average 500ft wide. Please watch the one minute video showing one of the smaller of these wave boats sending a wave over a dock at least 375 ft away. https://youtu.be/K_s1bn_b8SI
These boats should not be allowed to do towed sports on the Newberg pool.
