

We are writing to express our strong support for HB3870 which would provide much needed funding for the Mosier Center project. This updated joint fire station and community center will replace our current inadequate facilities. As our community grows and the threat of wildfire increases, the need becomes even greater. In the 5 years that we have owned property in Mosier 3 major fires have threatened our small city and our homes. As concerned citizens we have attended meetings and donated funds to reach our goal. Your support would allow us to bring this important project to completion.
