Measure, Appointment or Topic:

SB210

It's too easy to cheat with mail in ballots. I have seen too many people receive multiple ballots, and party affiliations being switched when the person did not do the switching.

Elections should not take days or weeks to determine the winner. Other countries do their elections in one day and they do not allow nonresidents to vote in their elections.

People say this will disinferschise certain classes or ethnic groups. You need a valid id for just about everything from driving, getting a loan to travelling, so I don't think that is a valid argument. Polling places accommodate people with disabilities, so that is not a valid argument either.

I support this bill and I think urge you to support it also.

Thank you.
