Measure, Appointment or Topic:

SB243

I am a long time democrat and I do not support these amendments and the dishonesty that this legislature is demonstrating. Stop with these bs amendments, it just demonstrates that you aren't doing this in good faith and are trying to hide. None of these amendments will actually do anything measurable to improve the safety of our communities. What we need is for the legislature to actually tackle issues that are the root causes of violence in our communities and stop wasting time and money on charades.

Time and again the data demonstrates that CHL holders are far less prone to commit violence, by abdicating the state's responsibility and spreading it among various entities just creates excuses to target and prosecute those that the police don't like, i.e. the poor and minorities. Same goes the other vague definitions proposed here.
