Elaine Redner

On Behalf Of:

Committee:

Senate Committee On Rules

Measure, Appointment or Topic:

SB210

Our voter rolls are in question. Our country suffers integrity issues about our voting standards. We must remove all doubt and create a standard by which we remove opportunity for fraud, cheating and voting error. Our country and our forefathers wanted the governed to be the consenting party to rules and standards. We are the governed and want to remind you we are ones who depend on you to represent our desires. Voting is not to be taken lightly and degrading our one opportunity to be heard to cheating without removing all ways to cheat is no longer protecting the integrity of our community. We the governed need you to support voter integrity and demand voter Id. Single day voting and no machines. Support no vote by mail (except absentee) and our integrity to return to the ballot box.
