Sergio Rodriguez

On Behalf Of:

Committee:

Senate Committee On Rules

Measure, Appointment or Topic:

SB210

Secure elections are the cornerstone of a functioning democracy. They ensure that every vote is counted fairly, accurately, and without manipulation. Without security, elections are vulnerable to fraud, interference, and misinformation, which undermine public trust and the legitimacy of elected officials. Protecting our electoral systems from cyberattacks, tampering, and external influence is crucial for preserving our democratic values and the will of the people. By safeguarding elections, we safeguard the integrity of our society and the rights of every voter.
