Dissolve voting by mail

I have been an Oregon resident for 30 years now . I also volunteer at the county elections office. I have seen many errors in the past few years voting by mail causes. There is too much of an opportunity for fraud , and before you reject this we all know it happens. Voting should be a privilege that we all should make the time for. In person voting not only engages the public , it makes them feel a sense of community , pride and commitment. If there happens to be a hardship or challenge to come to the poles. I agree that applying for an absentee ballot should be available to all voters that apply. Not to get too critical at this point I'd also like to bring up the issue of cleaning the voter rolls so we can get an accurate number of who is actually voting. Please take this advice into consideration.

Thank you kindly
