

Submitter: Ed Hoopman

On Behalf Of:

Committee: Senate Committee On Rules

Measure, Appointment or Topic: SB210

No credible evidence shows that mail in voting and early voting harm Oregon's election security.

Oregon's elections since being the first state in the nation to implement universal mail in voting have been secure and among the most participated-in.

Disinformation to the opposite effect is intended to harm our franchise, and take the vote from less able and working people.
