Measure, Appointment or Topic: SB210

Only properly-registered American citizens have the right to vote. To achieve trust, truth, and transparency, the state of Oregon must return to same-day voting to include voter ID, paper ballot, and a hand-counting system with no machines involved. I insist for a return to the in-person system of voting which was in place and working well when my family moved to this state in 1977. Voter registration through DMV should be discontinued as well; this was succinctly highlighted during the last election cycle with over 1200 invalid voter registrations. I call for the termination of mail-in voting, with exceptions for absentee voting.
