

Submitter:

Gregory Gregg

On Behalf Of:

Committee:

Senate Committee On Rules

Measure, Appointment or Topic:

SB210

Vote by mail is the most secure and universally available way to vote. Many who are disabled, without transportation, working people, and low income will find voting in person impossible. This bill disenfranchises many who under our current system are able to have a voice in government. We have been voting by mail since 1998, with little or no evidence of fraud or other problems. There is no reason to alter a system that has been proven to be one of the best in the United States. Please reject this measure.
