

Submitter: thaddeus durfee

On Behalf Of:

Committee: Senate Committee On Judiciary

Measure, Appointment or Topic: SB243

Currently we are facing a federal coup and you are surging to disarm the people of oregon. This will save no one, are you all so far from reality to truly believe this is what we need to resolve gun violence? While people struggle for food, housing, and job security we will have violent crime, how many times must we bandaid the symptoms before we start to use legislation to prevent the root cause?

You may pass these laws but the signal has been lit and there is no stopping it. People will import things banned under this law from legal states, and nothing will change. In this moment of overt fascism from our executive i would expect yall to want a well armed and trained population that will fight to protect our ways of life.

all amendments are equal and under the current supreme court you will lose wasting oregon taxpayers money. do better
