Measure, Appointment or Topic:

SB696

I believe in allowing =honorable people to own guns. For hunting and sport uses. Personal protection isn't something I believe a gun is for. The apparati included in this measure are not for hunting or sport. They are designed for massive destruction- including the taking of human life- not for any other purpose. They are a weapon of war. They do not serve a purpose and do not deserve to be in a civil society.
