Committee:

Senate Committee On Rules

Measure, Appointment or Topic:

SB210

While I am not opposed to in-person voting, I am opposed to eliminating the ease of mail in voting in our state. My elderly mother has severe arthritis and mobility issues. Three of my siblings have disabilities that prevent them from being able to drive. All of them live in a small coastal community where there is no public transportation, and all of them vote in every local, state, and federal election because they believe in the process and take pride in their civic duties. Creating any sort of barriers to their rights to act as responsible citizens is unconscionable.
