SB210

This bill is an outrageous voter suppression tactic and should absolutely be rejected. There is no evidence of substantial voter fraud with mail-in voting. I have lived in three other states, none of which had mail-in voting. Oregon's voters are so fortunate to have such an exemplary system for voting AND being informed about each candidate via the pamphlet that arrives prior to voting. Attempting to destroy mail-in voting is nothing more than a way to keep citizens from voting and is a blatant attempt to suppress the vote. Enough of this hateful and unnecessary legislation. Voters (at least some of us) are not stupid and we will fight this every step of the way, if need be. Why are Republicans so afraid of allowing Americans to vote? Because you know that when voters are educated, they won't vote for Republicans. And power matters to every Republican more than the well-being of the country and its citizens. Be careful what you wish for Republicans - power corrupts and you have all been absolutely corrupted. And voters know it.
