SB210

In person voting, with voter ID, meets the President's EO requirements and is the most fair, safe way to vote. This prevents most attempts at fraud and protects election integrity. This is one of the campaign issues that our current President ran and won on.

When we moved here from another State we were shocked that there was no in person voting. I lack of any in person voting is suspicious and I suspect it is unconstitutional. It is definitely NOT what our Founding Fathers believed in, nor do I believe Oregon's First settlers or first State legislatures would have supported taking our RIGHT to personally vote on election day away.
