Committee: Senate Committee On Judiciary
Measure, Appointment or Topic: SB243

Dear Lawmakers

Some things I am not necessarily opposed to in this law. The age restriction being one of them. The patchwork of legalities though I am against. The vagueness on the accessories on firearms I am also opposed against. The banning of concealed firearms adjacent to the gun free zones being another. What I worry about though is while most of these are not egregious on their own altogether it feels half baked as a law. This law and it's execution is vague and to be honest too much for one single law. This is rife with flaws to be abused by law enforcement against marginalized communities. And a tax burden that we also cannot afford when we are struggling to help pay for mental health programs and addiction programs we desperately need. All the while we are dealing with an attempted fascist takeover of the federal government. This is tone deaf and out of touch with most oregonians now. And because I know most of these laws are being funded by out of state billionaires and millionaires I would ask that you be a bit more skeptical with these laws being pushed especially by special interests groups like Moms Demand. Please revise, divide and do better.

Sincerely Alexander Hada
