| Committee:                     | Senate Committee On Rules |
| Measure, Appointment or Topic: | SB210                     |

The idea of vote by mail was very appealing to me at first but since the very first ballot I mailed in I have gotten a sick feeling about it. We were told that the voting process would be faster and more accurate than it was in person and that is simply not true. We were told that the computers used to count our ballots would not be connected to the internet and would be unable to be hacked and that simply isn't true. We now have voting weeks rather than a voting day and the cost of elections has increased dramatically over time.

The people who feel totally disenfranchised with the voting process in Oregon are more than capable of, ready, willing and able to be the volunteers that take us back to the polls. We are already in training to make in person voting with paper ballots and voter identification a real thing in Oregon again.

Please put this bill on the ballot and allow us, the voters, to tell you how we feel.

Sincerely,  
Duke Wilbur
