

Vote by mail works and I do not wish to see us revert to in person voting. Mail in voting allows people to vote who might otherwise find it prohibitive, including people with jobs who can not take time off, elderly and infirm who cannot travel easily, and others who, for their own reasons, would find in-person voting cumbersome. The federal government under this regime is attempting to create a system where they can more easily manipulate the vote and therefore the will of the people to move the tide of history to be represented by their chosen minions. I vehemently oppose this action and urge a no vote by the good representative politicians in our free state.

Signed,  
Kimberly Pohl
