Measure, Appointment or Topic:

SB210

I urge legislators to oppose this proposed bill. Oregon has long led the way with innovative, safe and effective ways to provide access to voting and engagement in Oregon politics. This bill would move Oregon backward, not forward. It would severely limit access to voting, making it available only to those who could visit a voting facility on the day of an election, those with the privilege to take time away from work, those with transportation, those who are physically able to wait in long lines and visit a polling center. This is voter suppression, and nothing more. There is limited evidence of fraud or concern with mail-in voting and those concerns—if truly concerns at all—can be remedied with other methods. Please vote no.
