Measure, Appointment or Topic:

SB210

Senators, I write this in support of SB210 regarding mail in voting. This was the way to vote legitimately as I grew up and became a voter. Mail-in voting was brought in as a cost saving, better outreach way of casting ballots. We have tried it and I look at the process as a failure. There are too many places where ballots are "unsecured" and therefore subject to questionable votes. There are deceased people voting, substitutes voting and questionable vote counts. Please go back to the only secure form of identification of the voter and reinstate in person voting. For those who are unable to cast in person continue to use absentee ballots but do so with computerized "Zoom" verification at the County Clerk level. Thank you in advance for bringing true verified votes and accountability to our selection process!
