

Submitter:	W Rowe
On Behalf Of:	Self
Committee:	Senate Committee On Rules
Measure, Appointment or Topic:	SB210

This is a manufactured solution to a spurious “problem.”

Even the Heritage Foundation identifies a grand total of 1576 incidents of voter fraud from 1982 to 2024.

Unsubstantiated campaign grandstanding by a pathological liar does not make this issue real.

Mail in voting is secure. Safeguards work well. The federal government does not dictate the way we hold our elections (Article I, Section 4, Clause 1, US Constitution).

This is a first step towards trying to seize control of our elections by the executive branch, which has already been threatening to eschew the US Constitution and the 22nd Amendment thereto.

This bill needs to be killed immediately.
