Measure, Appointment or Topic:

SB210

IF IT AIN'T BROKE, DON'T FIX IT!! There has been no proven fraud in the current system, although some like to foment conspiracy theories and spread disinformation for their own nefarious purposes. I believe their goal is voter reduction, if not outright suppression. I am coming up on 82 years of age; my knees don't work well; I have severe tremor in my hands; I tire quickly. It has been a blessing to receive my ballot in the mail and to drive it to a drop box. I wonder how many with aching bodies or facing inclement weather would simply choose not to stand in line at a polling place, or how many working two jobs or caring for children couldn't spare the time. I have often bragged about our vote-by-mail system to friends in other states and encouraged them to advocate for this system which WORKS REALLY WELL.

There is no need for this bill and it will cause a hardship for many. Also, it likely will cost substantially to put an entirely new system into place and pay poll workers. So again, IF IT AIN'T BROKE, DON'T FIX IT.
