

Submitter:

Sarah Silver

On Behalf Of:

Committee:

Senate Committee On Rules

Measure, Appointment or Topic:

SB210

As an eighty+ year old I know that having to drive to and then stand in long lines in order to vote would be very difficult. The Vote by mail system Oregon is wonderful for those who are not young but old enough to know a discriminatory measure when they see it. It also offers ample time to study and decide on various issues and candidates in the quiet of our homes and then having the joy of posting our ballots. This measure is obviously aimed at making it too hard for many to participate in our constitutional right for every citizen to have a vote. Shame on those who thought this up as a deterrent to a large group of US Citizens with disabilities of age or health. Yes, we have lived long enough, worked decades long enough, and and been involved in enough different community, state and national elections to make intelligent and informed choices and to also recognize deliberate attempts to deny us our rights to do so. Shame on those bringing this.
