SB210

This bill will quite obviously make it harder for citizens to vote - this is deeply concerning given that the Republican party is already descending into fascism. I wasn't allowed to vote in the 2024 election even though I was registered to vote, because the DMV sent my paperwork one day too late. That is voter suppression. This bill is voter suppression. A state that makes it harder to vote under the guise of combating voter fraud is an authoritarian state.
