Senate Committee On Rules

Measure, Appointment or Topic:

SB210

This bill is just another step Republicans are using to take away the vote from working people. There is very little evidence that Vote By Mail is less safe or secure than voting in person. This common misconception is being pushed by the current administration. Not only is it safe and secure, it's an integral component of keeping our elections safe and accessible. And it already has a long history of success! Numerous studies and audits have confirmed that mail-in voting fraud is extremely rare. I oppose this effort by Oregon house republicans to ban vote-by-mail in our state.
