Senate Committee On Rules

Measure, Appointment or Topic:

SB210

Having voted both ways- by mail and in-person- I honestly cannot see a reason that voting by mail isn't nationwide, except for attempted voter suppression.

Voting by mail is effective and convenient for busy people. It allows people to vote on THEIR timeline, without having to take hours off work. It allows people to work through the ballot slowly if needed, going back to the voter pamphlet to find answers about candidates or proposals, without worrying that they're slowing up the voting booth.

It works. Everyone that wants to, votes in Oregon. It's fair, accessable, and effective.
