Senate Committee On Rules

Measure, Appointment or Topic:

SB210

We have the best voting system in the country (world?). Why we would even consider changing it is mind-boggling. I look forward to spending an afternoon a week or so before each election and leisurely perusing the wonderful Voter Guide published by the state and making educated decisions on the candidates and ballot measures. No traffic, no lines, no wasting energy or fuel to travel to a voting site. And it has been proven that there is virtually zero fraud with Oregon's voting system, so why mess with it? "If it ain't broke, don't fix it"! This measure appears on the surface to be an effort to suppress voting, making it more difficult for many people to vote. Those who work on that day or who don't drive or live far away from voting locations would understandably be less inclined to vote. There is absolutely no reason for this bill to go any further. Thank you for listening.
