Measure, Appointment or Topic:

SB210

It was with utter disbelief and disdain that I read that this bill would even be considered by the Oregon Legislature. What a great waste of taxpayer money and legislators' time! There is no way we need to change from mail-in voting to in-person voting after nearly thirty years. It has been successful over that period of time. There has been 0.000006% fraud rate over those thirty or so years. Oregon elections are and have been secure in that period of time. Why make it more difficult for people to vote? What even is the reasoning for putting this bill to a vote??? Handicap people and fragile senior citizens would have difficulty getting to and waiting in line to vote. Additionally, it would be costly to make this change. How about using these monies being wasted here on improving our state roadways?
