Measure, Appointment or Topic: SB210

Requiring in person same day voting is a hard no. Why are you trying to take us backwards?

Voting by mail is a safe, trusted and age-old practice. It improves voter accessibility, which we should all want. Why would we want to purposely exclude qualified voters from participating? There is no evidence that fraud of any importance has ever occurred.

Polling data indicate that the public strongly favors expanded access to mail-in voting and that its results are partisan-neutral.
