Committee:

Senate Committee On Rules

Measure, Appointment or Topic:

SB210

I wholeheartedly SUPPORT this measure. Our current voting system allows for too many known, unknown/unreported incidents of ballot loss whether it be by accident, intentional destruction, theft, non delivery, untimely delivery, accidental registration of those NOT legally allowed to vote, improper handling and "replacement" of ballots by those seeking to circumvent our elections!! I believe there are currently too many "risks" (whether actual or potential), to be able to call them safe and secure! I would also question anyone's integrity who is "against" SB210. I would recommend that ALL ballots going forward, possess a space for the voters name, address and signature!! During an audit this would provide additional safeguards, as there would be no doubts as to who filled out/signed the actual ballot. Currently, ONLY the outer envelope contains that information. This does NOTHING to prove that the person who signed the "envelope" and who filled out the ballot, are actually one in the same!! That LACK of "identity" on ballots is VERY suspect in of itself. Why anyone thought that was "safe or secure" is beyond me? Only someone with ulterior motives would approve of that!! Thank you for your time!

Lisa Watts
