Senate Committee On Rules

Measure, Appointment or Topic:

SB210

We need election integrity to return to the voting system. Vote by mail happened when I was young, we still had in person poll voting prior and it felt like a right of passage.

Vote by mail has caused no one to care about voting, people have lost their trust in the system. It sounded like a great idea years ago but it has failed the people and needs to be repealed.

I won't go into the many potential risks of vote by mail but I can speak to receiving ballots for neighbors, deceased parents, not receiving my own and I can't be an anomaly. Voting in person just makes everyone accountable from the voters to the poll workers.

ID should be required to prove who you are, we had to do this prior to vote by mail. Everyone can get an ID, anyone saying it isn't possible is full of crap. You need ID for Alcohol, School, Doctors, airport, banking just to start.

Only valid US Citizens should be voting. If you are not a legal Citizen you should not be voting, for what I pay for in taxes and who should represent US Citizens.

There is no country in this world that allows noncitizens to vote in their elections. There is also no other country that has vote by mail. We are the only country that can not complete vote counts by the end of the election day. Fix the system, stop playing with it.
