Senate Committee On Rules

Measure, Appointment or Topic:

SB210

As a voter in Oregon my whole adult life we have had mail in ballots, it makes voting accessible for people who have difficulty getting around or having to take off work or find childcare to be able to vote. There have never been issues of fraud and there is a good system in place to prevent fraudulent voting by signature matching. This is an obvious initiative to suppress voter turnout and should be considered an attempted assault on our constitutional right to equal access to vote. Vote no.
