Senate Committee On Rules

Measure, Appointment or Topic:

SB210

It has been too long since we had a voting system we can trust. Just this last election there were non citizens automatically signed up to receive ballots and would be able to mail them in with no oversight. We need a system we can trust. Go back to in person voting with a valid ID. This world reeks with fraud. It is past time to at least make an effort to assure we have fair and accurate elections.
