Measure, Appointment or Topic:

SB210

I believe voting in person, with valid USA citizen voter ID, with a paper ballot, counted on election day by humans, not machines is the most secure way to vote. I greatly miss going to my local voting site, handing my voting card to a person at a table, she checking to see if I was on the list, then given a ballot to take to a privacy booth, voting, then handing back my ballot to another person, who then placed it in a secure box for tabulation. It was all done that night. It has been successfully done this way and it should again be done this way.

Just a further note: our children grew up and moved out of state. For five years, we received ballots for our daughter to vote. These included local, regional, state, and federal ballots. I find this a very easy way to commit voter fraud in elections that are not done in person on a paper ballot. Vote by mail is not a good thing for our state or our country. Please get rid of vote by mail. Thank you.
