SB210

Voting has become a game of fraud and needs to be revamped. In-person voting needs to replace mail in voting again after past events. Mail in voting has been proven to be insecure and with some states allowing mail in ballots to be received days after and some states literally weeks after voting has ended. Along with voter registration processes and verification issues with some states to allow non-citizens to vote needs to be stopped. I support us going back to the basics since the "PEOPLE" have no trust in the current process!!
