

Submitter: Erin Oesper Nytes
On Behalf Of:
Committee: Senate Committee On Rules
Measure, Appointment or Topic: SB210
To Whom It May Concern:

I am writing to express my opposition to this measure. I am honestly frustrated that this is even being discussed. A vast preponderance of the evidence shows that our elections are subject to very little fraud, and that mail-in voting improves participation.

I always exercise my right to vote, but mail-in ballots make me a better voter. I am able to research issues and ensure I understand the impact of my vote. Also, I recently broke my leg quite severely, and mail-in ballots make this process more accessible to me. The only reason I can fathom for returning to a less efficient and inclusive system, is to make it harder to vote.

I am an Independent voter, and don't really see either Party as representing my interests. However, should we move to an in person system, I think I will be forced to vote all blue ballots until Republicans start behaving more like representatives of their constituents. Shame on you.

Sincerely,
Erin Oesper-Nytes
