

Submitter: Tristan Lewis

On Behalf Of:

Committee: Senate Committee On Rules

Measure, Appointment or Topic: SB210

My name is Tristan and I grew up watching movies and playing video games which showed me explicitly what the Nazis did and how they did it. An actual "Nazi" no longer exists, but anyone touting their rhetoric or speaking of Nazis in anyway besides negative has no place in society. The current administration has not directly sympathized with Nazis, but they have crossed a line that myself and anyone who is paying attention should not let them continue passed. At no point did I, or any other elected officials vote for Elon musk. Elon Musk very clearly did a Nazi Salute TWICE. there have been two months straight of denial from our current administration of private South African citizen Elon Musk doing a Nazi salute in front of a camera that we watched with our own eyes. This is how little this administration respects you and I. I know what a goddamn Nazi salute looks like and you do too. This administration is not as smart as hitler's and they're no where near as competent. But they're trying to replicate Nazi Germany regardless. This is my first contribution to denying facism but it's far from my last. We need mail in voting for obvious reasons and this administration wants it gone for obvious reasons. We should not waste our time arguing the logical reasons for mail in voting such as benefiting disabled people because there is absolutely no argument for taking it away. We should be confronting this administration head on because they want control and they want less people casting votes. Democrats and republicans use mail in voting. Mail in voting increases voter turnout. Mail in voting is easy. Mail in voting is being targeted by an administration that has openly spoken about running a third term. If you call yourself a patriot and aren't completely full of bullshit then you support mail in voting and you'll protect it anyway you can. Thank you.
